Profile Summary

Self-taught and passionate Flutter Developer with 2+ years of freelance experience, specializing in building high-quality mobile applications and publishing plugins. Proficient in Flutter, Firebase, and third-party integrations like Razorpay. Adept at problem-solving, optimizing performance, and delivering scalable solutions. Seeking opportunities to contribute innovative ideas and collaborate in a dynamic development environment.

Technical Skills

Languages & Frameworks: Flutter (Dart)
State Management: BLoC, Provider, GetX
Tools: Firebase, Git, Razorpay, Postman, Flutter DevTools
Concepts: MVVM, Clean Architecture, REST API, CI/CD

Experience

- Spydo Technologies: Flutter developer** Jan 2025 – Mar 2025
 - Integrated REST APIs and third-party services to enhance app functionality.
 - Designed and developed visually appealing UI/UX to improve user experience.
 - Solved complex logical problems and successfully deployed applications to the Play Store while collaborating with clients in meetings.
- Freelance: Flutter developer** Jun 2022 – Jan 2025
 - Built and maintained Flutter applications using MVVM architecture with BLoC and Provider for state management.
 - Integrated REST APIs to enable seamless data flow and app functionality.
 - Successfully deployed multiple applications to the Play Store, ensuring high performance and stability.

Education

- Bachelor of Commerce (B.Com) - Distance Education** 2024 - Present
Andhra University, Visakhapatnam (Distance Mode)
- Higher Secondary (Commerce)** 2022-2024
Govt Boys Higher Secondary School, Malappuram

Experience

- Successfully published multiple apps on the Google Play Store, ensuring high performance and user engagement.
- Developed and published SystemState, a Flutter plugin with 100+ downloads on pub.dev.

Flutter Plugins

- system_state: Flutter plugin | Flutter** [pub.dev](#)
- Developed and published SystemState, a Flutter plugin providing real-time access to essential device states and controls.
 - Enables monitoring and control of Battery, Volume, Wi-Fi, and Mobile Data states, with real-time listening and update capabilities.
 - Supports battery level, temperature, charging status, volume adjustments, Wi-Fi and mobile data state monitoring, and more.

Ook Chat: AI-Powered Roasting & Conversational App | *Flutter (App) + Gemini API*

- Enables AI-powered roasting with Gemini API function calling for witty, context-aware replies.
- Supports speech-to-text (STT) and text-to-speech (TTS) for real-time voice and text interactions.
- Implements memory retention for personalized and adaptive conversations.
- Uses AI-based toxicity detection to filter inappropriate content.
- Optimized with serverless backend functions for fast and efficient processing.

Flukefy: E-Commerce | *Flutter (App) + Firebase (Backend)*

[Screenshots](#) | [GitHub](#)

- Backend powered by Firebase for seamless real-time data handling.
- Integrated Firebase Authentication for secure user login and registration.
- Follows MVVM architecture to ensure clean, scalable, and maintainable code.
- Includes a separate admin app for managing products, orders, and user activities.

Baithulmaal: Financial Management | *Flutter (App + Web) + Firebase (Backend)*

[Screenshots](#) | [GitHub](#)

- Built using Flutter with Firebase backend for efficient data management.
- Implements MVVM architecture for clean and maintainable code.
- Features an integrated admin panel within the app, accessible through distinct login credentials.

Oneiro: E-Commerce | *Flutter (App + Web) + REST API (Backend)*

[Screenshots](#) | [PlayStore](#)

- Integrated backend with REST API for seamless data exchange.
- Developed the front end of the Admin Dashboard to manage products, orders, and users efficiently.

MyLine: E-Commerce | *Flutter (App) + REST API (Backend)*

[Screenshots](#)

- Developed the front end of the e-commerce platform for a smooth user experience.
- Implemented MVVM architecture for scalable and maintainable code structure.
- Integrated Firebase Authentication for user phone number verification using OTP.

ESM: SaaS Platform | *Flutter (App) + REST API (Backend)*

[Screenshots](#) | [GitHub](#)

- Role-based screen management with user permissions for freelancers.
- Multi-tenancy support allowing multiple businesses to use the platform.
- Built with GetX for efficient state management and smooth UI interactions.

KleanIt: Online Cleaning Service Booking | *Flutter (App) + REST API (Backend)*

[Screenshots](#) | [GitHub](#)

- Enables users to book cleaning services and track service providers in real-time.
- Supports Customer, Salesman, and Admin apps, ensuring smooth service operations.
- Integrated Stripe payment gateway and in-app wallet for secure transactions.
- Includes FCM (Firebase Cloud Messaging) for real-time notifications.
- Features an in-app chat and notification system for seamless communication.

Inventory Management System | *Flutter (App + Web) + REST API (Backend)*

[Screenshots](#) | [GitHub](#)

- Designed for sales tracking, order management, and reporting.
- Includes separate apps for Admin and Salesman with role-based access.
- Works offline for uninterrupted order processing in low-connectivity areas.
- Features detailed analytics and reporting tools in the admin panel.

Metado: Online Meat & Fish Delivery | *Flutter (App) + REST API (Backend)*

[Screenshots](#) | [GitHub](#)

- A multi-app system with Customer, Vendor, and Delivery Boy apps, plus an Admin Panel.
- Vendors can add products via the Shop App, and customers can order via the Customer App.
- Customers receive order status updates and delivery boy details in real-time.
- Delivery boys and shop vendors can track their daily orders and earnings.
- Integrated Razorpay payment gateway for seamless transactions.
